

COALITION FOR HEALTH SECURITY

"Due to the lack of a system of health care in the United States, residents are left unprotected in their time of greatest need; when illness or accident occurs. The solution is clear: create a coordinated health system that guarantees continuous lifelong care to all people based on a single standard of high quality. Single payer funding allows us to share the risks and pool our resources in order to work together to create health security. Therefore, I/we will join with the Coalition for Health Security to create a coordinated system of health care that is continuous, inclusive and comprehensive."
